## **SECTION VI - SCHEDULE OF REQUIREMENTS**

The State Department for Livestock has supported various dairy groups and cooperatives in the country to sale their milk in bulk to access the milk market provided by dairy processors over the years. This has been achieved through support by projects in distribution and installation of bulk milk coolers to the dairy groups and cooperatives.

A major challenge for some of these groups is the issue of quality and safety of milk delivered to these facilities leading to rejection of significant quantities of milk by the processors. In addition, it also poses a health risk to consumers of milk from these collection facilities.

The State Department intends to purchase Milk Analyzers to be used for testing samples of milk delivered before mixing with the rest in the collection tanks. The simple analyzers can detect high bacterial load, added water and other impurities which affect milk quality. The Milk Analyzers will be distributed to these groups and cooperatives as follows:-
